

Timber Purchasing Policy

1. Management

The BDP Imports Limited directors are responsible for the implementation of the policy. All employees involved with timber purchase and logistics are to be made aware of the purchasing policy and are to be annually updated.

2. Timber Legality

The company is committed to purchasing timber from legal sources and keeping up to date with any relevant changes in legislation and procedure.

3. Factory Selection

Prior to confirmation of Purchase Orders, a full and comprehensive factory visit must be conducted. This must involve face to face communication with owners/directors and inspection of production facilities. Factories will also need to provide relevant certificates and documents to back up their timber legality claims.

4. Policy Improvements

BDP Imports Limited will continuously strive to maintain and improve this purchasing policy. With the recent ratification of the Indonesian SVLK accreditation scheme by the EU, we are able to ensure ALL timber imported is responsibly sourced.

5. Volumes

For year ending December 2020, BDP Imports Limited imported approximately 15% of its timber from FSC sourced timber and 85% from Indonesian SVLK accredited timber and we are forecasting similar trends for 2021. **With the ratification of the Indonesian SVLK/ FLEGT Scheme by the EU, 100% of our timber furniture is covered by accreditation.**
